**The big success of the Roller Grill Chrome Plancha in Maison & Objet !**

For the first participation in the exhibition Maison & Objet in January 2007, Roller Grill impressed the visitors with a high quality line of chrome plated griddleplates. This new range is the result of a perfectly controlled know-how by Roller Grill: to apply technologies developed in catering to domestic equipment.

Already appreciated in catering for its quick and tasty cooking, the griddle plate appealed to many gourmets on Maison&Objet, the Home Exhibition « par excellence ». Thanks to its performances ( direct transfer of the temperature and a perfect homogeneous cooking thanks to a very smooth plate) and its good cooking surface (simple and double models available in gas or electric), the elegant Roller Grill griddle plate offers a dietetic, varied and generous cooking of every kind of food with spices or herbs for your grills in the kitchen or barbecues outside.

And you? Did you think of laying out a space « gourmet products » for the lovers of domestic high quality products?
